

Low Code Innovation at the Dept. of Health and Human Services (Team Shenandoah)

Project Title	Low Code Innovation at the Dept. of Health and Human Services (Team Shenandoah)
Project Summary	Obtain first-hand experience with low-code and no-code platforms within the Office of the Chief Product Officer (OCPO). You will work on a student development team to develop and support various innovation projects.
Country	United States

Project Description

You will be tasked with organizing and working in a scrum team for low-code/no-code platforms used within the Office of the Chief Product Officer (OCPO).

The ideal team will have the following roles:

- UI/UX Interns (2) – Assist in the development of usable, accessible interfaces for various platform projects
- Servant Leader (1) – Organizes the work, tackles what gets in the way, and keeps things moving
- Developers/Testers (3) – Uses low-code/no-code tools to develop functionality in a cloud-based platform; assists in validation/testing/migration of configuration/configuration sets to test environments

Key skills required of all interns are:

- Willingness to learn/adapt
- Can-do, positive attitude
- Self-management and self-organizing
- Problem solving
- Interest in serving the public good

Required Skills or Interests

Skill(s)
Coding
